EDUCATION

- **Indira Gandhi Delhi Technical University for Women** New Delhi, India
B.Tech Computer Science with Specialization of Artificial Intelligence Aug 2023 – May 2027
CGPA: 8.55 / 10.0

SKILLS SUMMARY

- **Languages:** C++, Java, Python
- **ML/AI:** Scikit-learn, XGBoost, Pandas, NumPy, LangChain, FAISS
- **Databases:** MongoDB, Supabase
- **Tools:** Git, GitHub, Jupyter Notebook, Google Colab, Tableau, Kaggle, Matplotlib
- **Concepts:** OOP, DBMS, Operating Systems, Data Structures & Algorithms

EXPERIENCE

- **ISSA, DRDO** Remote
Machine Learning Intern Jan 2026 – Feb 2026
 - **Machine Learning Pipeline Development:** Built an **end-to-end rainfall forecasting pipeline** processing **23,725+ meteorological observations** spanning **65 years (1960–2024)** across **6 geographic regions**, implementing scalable data preprocessing, temporal feature engineering, and chronological model training for time-series forecasting.
 - **Deep Learning Model Engineering:** Designed and benchmarked **6 forecasting models (ARIMA, SARIMA, MLP, CNN-LSTM, GRU, ConvLSTM)** using **Python, Keras, Pandas, NumPy, Scikit-learn and Statsmodels**. Engineered **28 predictive temporal features**, enabling the **GRU model** to achieve the best standalone performance (**$R^2 = 0.502$**).
 - **Model Optimization & Performance Evaluation:** Developed a **GRU + CNN-LSTM hybrid ensemble** achieving the project's highest accuracy (**$R^2 = 0.506$, $MAE = 4.372$ mm, $RMSE = 10.865$ mm**). Conducted comprehensive benchmarking using **MAE, RMSE, R^2 , and SMAPE**, including node-wise and seasonal performance analysis to validate model robustness.
- **Centre of Excellence, IGDTUW** New Delhi, India
Machine Learning Intern June 2024 – July 2024
 - **Medical Diagnostic Modeling:** Developed and benchmarked **5 machine learning classifiers (Decision Tree, Random Forest, Logistic Regression, KNN, XGBoost)** for cervical cancer prediction, achieving **95.2% test accuracy** while evaluating models using Accuracy, Precision, Recall, F1-score, and ROC-AUC.
 - **Data Preprocessing & Feature Engineering:** Built an end-to-end preprocessing pipeline incorporating **Decision Tree-based missing-value imputation, SMOTE oversampling**, feature scaling, and feature selection, improving minority-class detection with **Decision Tree recall reaching 86.7%** on the balanced dataset.
 - **Model Optimization & Evaluation:** Optimized classification models using **GridSearchCV, RandomizedSearchCV, and 5-fold cross-validation**, benchmarking multiple algorithms to improve predictive reliability and minimize false negatives for early cervical cancer detection.

PROJECTS

- **Sanjeevani : Multi-Agent Medical Report Intelligence System (Python, Generative AI, RAG, LangChain, Supabase)**  
 - Developed a **Multi-Agent AI healthcare platform** leveraging **Large Language Models (LLMs)**, **Retrieval-Augmented Generation (RAG)**, and **vector search** to analyze medical reports, generate personalized health insights, assess risks, and answer report-specific queries through **conversational AI**.
 - Built an **end-to-end intelligent healthcare system** featuring automated biomarker extraction, medical report interpretation, trend analysis, doctor-visit preparation, secure authentication, cloud-based report management, and interactive health dashboards using **Streamlit and Supabase**.
- **Udaan : AI Powered Career Operating System(React.js, Node.js, Express.js, TypeScript, Groq LLM, Supabase, PostgreSQL)** 
 - Architected a production-ready **AI-powered Career Operating System** by integrating LLMs, secure authentication, resume parsing, ATS optimisation, job-description intelligence, AI mock interviews, personalised career roadmaps, and project recommendations into a unified full-stack SaaS platform.
 - Orchestrated a scalable microservice-based architecture using **React, Node.js, Supabase, PostgreSQL, REST APIs**, delivering an interactive glassmorphism UI, real-time AI workflows, cloud deployment (Vercel & Render), and modular components for seamless feature extensibility.

HONORS AND AWARDS

- NFPC 2026 - Qualified Phase 2 of the RBIH & IIT Delhi Innovation Challenge, selected from 2000+ participants.
- Finalist, India Innovate 2025 - National-Level Open Innovation Competition. (March 2025)
- Hack-4-Purpose Hackathon — IIT Delhi - Selected as one of the top 20 finalists. (May 2024)
- Leetcode - Solved 250+ problems across Data Structures and Algorithms.
